Fellowship Positions at the
Centers for Disease Control and Prevention
National Center for Environmental Health
Division of Laboratory Sciences

The Clinical Chemistry Branch (CCB) at the Division of Laboratory Sciences (DLS), National Center for Environmental Health, CDC, conducts research and provides laboratory support to improve the detection, diagnosis, treatment and prevention of various chronic/infectious diseases.

We are seeking a candidate with B.S. or M.S. degree in science or engineering and undergraduate research experience or relevant employment.

This fellowship will provide the opportunity to obtain hands-on experience with state-of-the-art laboratory equipment applied to targeted proteomics and lipidomics work flows. Candidates have the opportunity to be mentored in a research group with extensive experience with bioanalytical applications, hyphenated sample preparation techniques, capillary electrophoresis, liquid chromatography and various mass spectrometry platforms.

The following skills are desired:

- B.S. or M.S. degree in sciences with GPA 3.0 or higher.
- Undergraduate/graduate research experience in a chemistry or biochemistry laboratory.
- The aptitude to review scientific literature, conduct laboratory experiments, interpret and evaluate results and other findings, and write reports describing the results and conclusions.
- Other preferred skills: biological sample preparation, chromatography, capillary electrophoresis, mass spectrometry, LC-MS data processing and statistical analysis.

This fellowship is administered through the Oak Ridge Institute for Science and Education (visit http://orise.orau.gov/cdc/ for further information). The duration of this fellowship appointment is 1 year with possible extension to 4 years. The stipend depends on experience and qualifications and follows those described in federal salary tables (GS tables). The workplace is located at CDC Chamblee campus, Atlanta, GA.

Applications should be emailed to Jon Rees (JRees@cdc.gov) by June 1st, 2022. The application should include a curriculum vitae or resume, copy of official transcripts, current pay stub or salary on letterhead (if applicable) and two letters of recommendation (letters on organization’s letterhead attached via E-mail are sufficient).
